

RPSG Ventures Limited
Energy and Carbon Policy

RPSG Ventures Limited ('RVL', "the Company") recognises the effort of lowering the carbon footprint by sustained reductions in fossil fuel consumption and rapid growth in renewable energy and is committed to become a climate steward, take actions within the operations to reduce energy consumption, related carbon dioxide emissions.

The Company and all its value chain members shall endeavour to:

- comply with local, regional and national normative requirements related to energy and carbon regulations;
- define the specific energy consumption and maintain year-on-year efforts to reduce energy intensity and carbon footprint within the business operation;
- address climate change through development of both mitigation and adaptation measures and build climate resilience in line with India's Nationally Determined Contributions to the Paris Climate Change Agreement and the National/State Action Plans on Climate Change;
- seek to improve energy and carbon performance in operations and actively adopt innovative, resource-efficient and low-carbon technologies and solutions resulting in lower carbon footprint;
- sensitise value chain members including logistics and product supply chains to encourage efficient use of energy resources and reduce energy and carbon footprints in their business, work with stakeholders to provide solutions to mitigate and adapt to climate change impacts;
- increase reliance on renewable energy within operations as reasonably practicable;
- engage, collaborate, and seek feedback with all concerned stakeholders and communities to demonstrate our commitment to greenhouse gas emission reduction principles and promote energy efficient technologies.
